MONEY AND RINGS GONE

Members of Crew of Montana are Wiser Now

U. W. Spencer, a ship's cook attached to the U. S. S. Montana, is

missing and the officers have sent out rewards for his capture. It is reported that with Spencer went some of the crew's money, amounting to \$500 or more, which was secured mostly in loans from his shipmates. One man is said to have been a loser by \$85.00. In addition to the money it is alleged that he took two valuable rings from one of the crew.

FOUND DEAD IN THE WOODS

Albert Snow Died From Natural Causes Near Camp at Sagamore.

Albert Snow was found dead Thursday evening in the woods at Sagamore Creek, death being due to natural causes.

Ally Snow, as he was better known, was one of the familiar characters of this city and was known to about everybody. On Thursday he was seen at one of the camps at the Sagamore, and later found dead.

The body was discovered by Thomas Williams and E. A. Blackley, who had been down to the camp of Henry Sheridan for supper and were on their way out to catch the car. Mr. and Mrs. Sheridan had stopped to lace up the tent and Williams and Blackley had started ahead when they suddenly came upon the body of a man stretched out about fifty yards from

another camp. A light was procured and Sheridan recognized Snow. He was taken to the camp and every effort made to bring him to, but he was evidently dead when found.

Mr. and Mrs. Sheridan came to this city, leaving Williams and Blackley with the body of Snow, and notified the police and they in turn notified Medical Referee W. D. Walker, who went down.

He found that Snow had been dead for some time and that death had resulted from natural causes, and he turned the body over to Undertaker O. W. Ham.

Snow was a native of this city and about 52 years of age. He has worked for years at gardening and other jobs which he could pick up about the city. As a young man he worked some years at the printer's trade.

ROBBED WHILE HE SLEPT

Newburyport Man Has Troubles On His Trip From Boston

On Thursday evening a young man by the name of William H. Sullivan, a passenger on the night Pullman bound from Boston to Newburyport, had a bunch of hard luck in his trip.

Sullivan got carried by his home station and was landed in this city. There was no way he could return until 3.10 this morning and he decided to pass the time in the depot waiting room where he soon dropped off in a deep slumber.

While dreaming on the soft side of a board he had a visitor who did not bother about waking him up to make himself known, but annexed himself quickly to a dress suit case of Sullivan's which stood on the floor nearby. When the Newburyport man came to, he found that he had been relieved of his property and reported his loss to officer Murphy, who later arrested a man with a suit, case which answered the description.

Sullivan was notified at his home in Newburyport and the man held on suspicion will be heard in police court if the property is identified as that stolen.

TO RAISE THE MAINE

President Taft Has Issued the Orders

Beverly, Mass., Oct. 14.—President Taft has finally approved plans for raising the wreck of the battleship Maine from Havana harbor, which called for the completion of the work on or before the thirtieth anniversary of the destruction of the war vessel, Feb. 15, next.

The work is to be done according to plans made by army engineers, and to be under direction of an engineer officer.

President Taft believes that the paramount question in the raising of the Maine is the determining for all time whether the cause of the explosion, and whether the source of destruction was from the outside or inside the vessel. For this reason he desires that the work shall remain in the hands of the army engineers and not be let out by contract.

By direction of the president, Spain has been invited to send a representative to Havana to be present during the work of exposing and removing the wreck.

The disposition of the old hulk remains to be settled. The army engineers believe that it will be possible to float the after two-thirds of the vessel. The forward third, where the explosion wrought the heaviest havoc and killed the greatest number of the crew while they were asleep in their quarters, is believed to be too far gone ever to be taken out as a whole, and the wreckage will be removed piecemeal.

If congress approves the recommendation of the engineers in charge, the wreck will be taken out to sea and given a ceremonial burial in deep water, there to remain until the end of time.

Gen. William H. Bixby, chief of engineers of the army, spent an hour with the president on Thursday and after explaining the plans for the removal of the wreck in detail, secured the president's formal approval in writing. General Bixby later issued a statement which in a formal way outlines the work to be undertaken. He believes that the task can be completed within three months and while no special effort is to be made in that direction, it is his opinion that Havana harbor will be clear of the wreckage Feb. 15, next.

If the wreckage of the forward part of the vessel is in a condition

A CUP FOR THE SAILORS

Local Masters Mates and Pilots May Offer One

Piscataqua Harbor, No. 83, of Masters, Mates and Pilots, will consider at their next meeting on Nov. 1st, the matter of establishing a Piscataqua silver cup to be won by the sailors of the North Atlantic squadron, of whatever class of vessels that visit our port, over some course in Great Bay or Piscataqua river; the winner to be the best time during the year 1911 and the cup open to all United States vessels coming to our port, the details of the race to be worked out later.

This movement on the part of Piscataqua Harbor is in keeping with its policy. It works for existing industries as well as prospective industries. It recognizes that the navy yard is the greatest single industry, that in all probability the port will ever have, and Piscataqua Harbor will ever be found working with zeal for the navy yard, on the principle that we want to hold what industries we have, and increase them if we can. The Harbor is not "a two year old" yet, and won't be till Jan. 1911, President Hott and his associates have spent time, money and energy advertising the possibilities of the port among the railroads and steamship lines of the country. They believe their efforts will be rewarded in the near future and that Portsmouth will become not only a great naval port but a commercial port, this combination the Piscataqua Harbor, No. 83, is working zealously with the Grand Harbor to secure.

Saturday at Benfield's you can get Jellydon at 8c pkgs., Win. Tell Flour at \$3.50 bbl., 85c bag; pearl tapioca 4 pounds for 25c.

to permit of definite conclusions, the cause of destruction of the ship on Feb. 15, 1898, will have been determined probably by the middle of January next. No portion of the wreck is to be disturbed until a full opportunity has been given to view it and study it.

REPAIRING THE OCEAN CABLE

The British cable steamer, Mackay Bennett, which is making headquarters temporarily in Portsmouth harbor is engaged in repairing the ocean telegraph cable about seven miles off the Rye shore where the American end of the cable has its landing.

It is supposed that the damage to the cable came from some fisherman fouling it with an anchor.

CALLS IT AN INSURRECTION

French Strike Is Criminal, According to the Premier

THE SUMMONS TO COLORS

Large Number of Railway Men Ignore Order to Serve as Reservists During Struggle—Commerce Has Already Begun to Suffer Greatly—Government Meets Situation With Firmness, Giving No Quarter to Strikers

Paris, Oct. 14.—All France is tied up by the great railroad strike, which Premier Briand denounces as "an insurrection built purely upon criminal foundations." The Paris end of the Western road strike is complete. The highways out of the city are jammed with humanity, and in all manner of vehicles.

The strike now includes the five great trunk lines of France. The employees of the Paris subway have voted to strike, following the same decision on the part of the employees of the Eastern, Orleans and Paris, Lyons and Mediterranean lines.

The call of 30,000 strikers to the colors as reservists has been largely ignored. In spite of this official decree will be issued as soon as possible calling every railroad employee to the colors.

The loss to commerce is enormous. Whole train loads of produce are rotting where the trains are stalled by the strike. Food is being rushed into Paris from the sea up the river Seine. All the food coming in from the land side is also river borne. Prices of fish, eggs, butter and milk have jumped more than 25 percent in twenty-four hours. Merchants are arranging to have food brought into the city in automobiles, but unless the strike is broken quickly war time prices will soon prevail here for food.

Premier Briand is bitter against the strikers. He says that those responsible for it will be prosecuted criminally.

Most of the violence so far reported on the part of the strikers has been on the Western road. There they have held up trains, derailed others, destroyed signals, ripped up rails and destroyed telephone and telegraph communication.

Telegraph lines connecting several French points with London, Brussels and Berlin were destroyed. American travelers are having hard times getting to the coast.

The strikers have now resorted to attempts to wreck passenger trains. The Southwest express was nearly wrecked by the cutting of the air brake tubes. At Bois Colombes the strikers held up the express train for Havre and forced the engine driver and his crew to abandon the train at the point of their revolvers. The locomotive was then uncoupled and toppled over from the track.

The French government is meeting the situation with a firmness that challenges the admiration of even those who sympathize with the men in their demands for a minimum wage of \$1 a day. Five of the most influential strike leaders have been placed under arrest. This action was in fulfillment of Briand's promise to punish the agitators who, he has declared, precipitated an insurrectionary movement at the very hour that the premier and M. Millerand, the minister of public works, posts and telegraphs, were conducting negotiations looking to the peaceful adjustment of the differences between the railroad managers and their employees.

The arrested leaders were charged with provoking seditious meetings and leading in violence and destruction of property. The government is convinced that this move, together with the summing to military service as reservists all of the strikers, will break the backbone of the strike.

ASSESSOR ARRESTED

Chief of Department at Cambridge Charged With Theft

Cambridge, Mass., Oct. 14.—Daniel B. Shaughnessy, principal assessor of Cambridge, was arrested and arraigned in court here, charged with larceny of \$172. He was placed under \$500 bail to appear for a hearing Oct. 19.

The arrest of Shaughnessy followed an investigation by the Taxpayers' association of Cambridge. It is alleged by the complainants that Shaughnessy, after receiving the money from certain people to pay their taxes, abated the taxes of his own relatives and instead of returning all the money, kept a part of it.

Three Victims of Insane Lawyer
Rome, Oct. 14.—Rendered suddenly insane, Signor Moncada, a lawyer in this city, barricaded his residence and fired recklessly into the street, killing one woman and seriously wounding two others.

Severe Storm Sweeps Jamaica
Kingston, Jan., Oct. 14.—A terrific rain storm prevails over the greater part of the island. Kingston is flooded. Business is suspended. The railway and tramway service is partially interrupted.

ROOT FOR SUPREME COURT

Belief That the President Will Make Him Chief Justice

Washington, Oct. 14.—President Taft is seriously considering the advisability of appointing Senator Root of New York chief justice of the United States supreme court.

It is feared that the president has had the appointment of Root in mind almost from the day of the death of Chief Justice Fuller and officials of the administration who have conferred with him are authorized for the statement that it is Root and not Hughes whom the president desires to make chief justice.

It is declared upon excellent authority that should Root see his way clear to accept the president's proposition to retire from the senate for the purpose of going upon bench there is every reason to expect his appointment as the successor of Chief Justice Fuller.

URGES WOMEN TO FIGHT FOR BALLOT

Abolishment of Male Vote Advised by Lillian Russell

Pittsburg, Oct. 14.—"Woman has forced herself into a position where she has to fight for her rights, and now that she is fighting in organized earnest, why not take the real step—the consummation of suffrage for women and the abolishment of the male vote."

This is one of the assertions made by Lillian Russell, who takes the stand that the American woman is not getting what is coming to her. In part Miss Russell said:

"Absolute suffrage for women and the withdrawal of the power and the rights of government from man's hands will give the men themselves a fuller opportunity to play the game in which they have been most successful."

SPAIN AN ARMED CAMP

Troops Are in Readiness to Crush First Signs of Rebellion

Madrid, Oct. 14.—Spain's drastic military precautions to stamp out revolt against Alfonso's throne have come to a climax. For a fortnight troops have been massed in the barracks at Madrid, Valencia, Barcelona and other centers of dissension. In Catalonia, the hotbed of agitation against monarchy, General Weyler, who declared that he would stifle the first signs of rebellion in blood, is at the head of a great military force.

Not alone the cities, but Spain in its entirety, is an armed camp. The frontier and provincial districts are policed with soldiers. Artillery is massed at all strategic points. Soldiers with bayoneted guns and double rounds of ammunition are used as police. The government's plan is to overawe the people by a tremendous military display.

OPPOSED TO RESUBMISSION

Good Templars Will Make an Effort to Keep Maine Dry

Biddeford, Me., Oct. 14.—Strong opposition to the resubmission of the prohibitory liquor law to the voters of the state was voiced last night by the semi-annual convention of the grand lodge of Maine Good Templars in this city.

A committee was appointed to take steps on behalf of the grand lodge towards preventing the question of resubmission. A long set of resolutions was adopted upholding prohibition.

CAPRON OUT OF CONGRESS FIGHT

Providence, Oct. 14.—The Second congressional district committee will meet to consider the matter of choosing a candidate for congress in the place of Congressman Capron, who has declined to run. Capron's reason for declining to run is his poor health.

FORMER SENATOR HILL SICK

Albany, Oct. 14.—David H. Hill is ill in Wolfert's Room, his country home near this city, but his condition is not regarded as serious.

PLANS OF ARMY MEN ADOPTED

Battleship Maine to Be Raised by Feb. 15

CAUSE OF THE DISASTER

President Taft Considers It Paramount Question—Spanish Officials Will Inspect Wreck—Disposition of Hulk Remains to Be Settled—Work of Removal Has Been Cleared of All Red Tape

Beverly, Mass., Oct. 14.—President Taft has finally approved plans for raising the wreck of the battleship Maine from Havana harbor which called for the completion of the work on or before the thirtieth anniversary of the destruction of the war vessel, Feb. 15 next.

The work is to be done according to plans made by army engineers and to be under direction of an army officer.

President Taft believes that the paramount question in the raising of the Maine is the determining of all time of the cause of the explosion, and whether the source of the destruction was from the outside or inside the vessel. For this reason he desires that the work shall be retained in the hands of the army engineers and not let out by contract.

By direction of the president, Spain has been invited to send a representative to Havana to be present during the work of exposing and removing the wreck.

General Bixby, chief of engineers of the army, spent an hour with the president yesterday afternoon and after explaining the plans for the removal of the wreck in detail, secured the president's formal approval in writing. Bixby later issued a statement which in a formal way outlines the work to be undertaken.

A large number of the bodies of sailors who lost their lives in the disaster were never recovered. It is believed that nothing but skeletons will now be found. These will be removed at once and taken to Arlington national cemetery at Washington for burial.

After the wreck has been thoroughly examined and studied, bulkheads will be built into such portions of the wreck as it is thought can be floated, and the damaged portions will be hoisted from the bottom piecemeal. Congress then will be asked to settle the question of the disposition of the last remnants of the armor clad whose destruction is generally believed to have precipitated the Spanish-American war.

If congress approves the recommendation of the engineers in charge, the wreck will be taken out to sea and given a ceremonial burial in deep water, there to remain until the end of time.

The wreck is now in twenty-five feet of water. It has sunk but one foot for the twelve years and a half since sinking.

The dam to be constructed about the wreck will be 415 feet in length and 275 feet in width at the widest point. Twenty or more plans were submitted to the army engineers and to the president for raising the wreck. None was so simple as that adopted by the army officers.

When Bixby was asked whose plan had been finally determined upon, he replied: "It is best to call it simply the common-sense plan." President Taft has cleared the work of removal of all red tape.

The engineer officer who will be designated to take charge of the work is to be free of all interference, is to make his purchases in open market and to employ labor wherever he can find it, as he shall direct. Speed in pressing the work to completion and accuracy in determining the cause of the wreck are to be the two essentials.

Five more bombs found
Indications of Determination to Destroy Bridge Work at Worcester
Worcester, Mass., Oct. 14.—Five bombs, each in the form of a potato, filled with what is supposed to be nitro-glycerine or some other high explosive, have been found at the bridge work under construction in connection with the new Union station.

Louis Senechal was arraigned in district court charged with attempting to destroy a bridge with a bomb. He pleaded not guilty, and at the request of Chief Matthews his case was continued for a week, he being held in \$2000 bail.

HIGH PRICES FOR COINS

New York, Oct. 14.—One thousand six hundred and thirty dollars was the price paid for sixty-five 1-cent pieces. The coins were of the issue of 1794 and the prices per coin ranged from \$50 to \$101.

THE WEATHER

Albany, Saturday, Oct. 15.
Sun rises—6:09; sets—5:16.
Moon rises—3:30 a. m.
High water—8:15 a. m.; 8:46 p. m.
Forecast for New England: Probably increasing cloudiness, with showers in north portion; moderate south winds.

MISUSE OF THE MAILS

Charge Against Manager of Investment Company at Boston

Boston, Oct. 14.—Charged with using the mails illegally, Charles H. Brooks, manager of the Redeemable Investment company, which occupies an entire floor at 85 Devonshire street, was arrested by United States Deputy Marshal Ruhl.

The offices of the company are sumptuous in the extreme. A great deal of literature, explaining the scheme of the concern, was found there. This literature says that the company was capitalized at \$10,000,000, 1,000,000 shares at \$10 a share.

Among the property the company claims to have are wheat lands in the northwest, timber and mining lands in the southwest and in Mexico. Promises are made to redeem half of the stock with interest at 6 percent.

Brooks was arraigned before Commissioner Hayes and held in \$3000 for a hearing Oct. 20. Bail was furnished.

GRANTED AN INJUNCTION

Mrs. Chanler No. 1 Steals March on the Opera Singer

New York, Oct. 14.—Justice Guy, in the supreme court, granted to Mrs. Julia C. Chanler, first wife of Robert W. Chanler, an injunction against R. W. Chanler, Lewis S. Chanler and Winthrop Chanler, the Union Trust company and the New York Insurance and Trust company, as trustees of the Chanler estate, and Lina Cavallieri Chanler, restraining them from disposing of or transferring any property belonging to Robert W. Chanler until the action brought by the plaintiff to set aside the prenuptial agreement entered into by Robert W. Chanler and Lina Cavallieri is determined in court.

Mrs. Julia C. Chanler is Robert W. Chanler's divorced wife, and the mother of his two children, of whom she was given the custody when she obtained a divorce.

NEW REPUBLIC IS SALUTED BY POWERS

The United States Expected to Fall Into Line

Lisbon, Oct. 14.—The German minister to Portugal, setting upon instructions from Berlin, took initial steps to enter into semi-official relations with the Republican provisional government of Portugal, following the official recognition from Brazil and notification by the Swiss government that the Alpine republic is now ready to recognize officially the provisional regime.

The international status of the Portuguese situation is brighter today than it has been at any time yet. It is believed that France and Italy and the other important continental powers will lose no time in recognizing the new government, now that England and Germany have indicated the courses which they will pursue, and that the United States will then fall into line.

EIGHTY-FOUR FEET IN AIR

Steeple Jack Enjoys a Snooze and Scars Fellow Workmen

Boston, Oct. 14.—While working on the steel trusses of the Boston Arena building, on St. Botolph street, eighty-four feet in the air, "Steeple Jack" Eccles went to sleep and had a fine, quiet nap.

Some of the other steeple jacks saw Eccles and thought he must have dropped dead. One of the hoister climbers of the crew volunteered to crawl up over the network of steel crossbars and see what could be done to get Eccles down.

As he neared Eccles he stopped astounded. Eccles was deep in a slumber. The climber awakened Eccles by a gentle shake and Eccles then took up his tools and went coolly to work.

SEVEN KILLED IN FIRE

Champion Billiard Player Among Victims in Montreal

Montreal, Oct. 14.—Seven lives are believed to have been lost in a fire which destroyed the King's hall building on St. Catherine street.

Among the victims was Charles Threshie, a member of the Boston Athletic association and the foremost figure in amateur billiard circles of Boston. In 1898 he was the winner of the D. A. A. club championship.

Since then he has been prominent in national billiards. About six weeks ago he came here to take charge of a thirty-six table billiard parlor.

MONTREAL BROKER MISSING

Twenty Percent a Month Operator Has \$2,000,000 Outstanding

Montreal, Oct. 14.—With outstanding bills amounting to \$2,000,000, C. D. Sheldon, a broker, who has been making 20 percent a month on stocks with money given him by persons all over Canada, has left this city and is believed to be in New York. Unless he returns today the books belonging to the broker will be turned over to the authorities by his office manager.

Up to a week ago the books of the broker showed a profit of \$1,600,000.

MARKING TIME UNTIL MONDAY

Democrats Awaiting Count of the "Straw Vote"

THE STAND OF MACLEOD

Chairman of Committee of Four Will Break Deadlock If Canvass Shows Hamlin to Be Choice of Delegates—Vahey Thinks Hamlin Should Be Nominated and Declares That He Can Sweep the State

Boston, Oct. 14.—Not until next Monday will the Democratic committee of four resume its deliberations over the task of picking a candidate for governor. The action of the Democratic state committee has caused the delay. The committee feels that it would be folly to take up its work until the preference from the delegates to the convention are received by mail. Consequently nothing remains for the committee to do but mark time.

The committee members met yesterday and talked over the situation. A meeting was scheduled, but the informal discussion showed that nothing could be accomplished by further deliberation on the candidates, as the committee is hopelessly deadlocked between Hamlin and Foss.

Frederick J. Macleod, chairman of the Democratic state committee and one of the members of the committee of four chosen by the Faneuil hall convention, declared that he would break the deadlock that has tied up the committee, and cast his vote for Hamlin if the canvass that is being taken of the convention delegates by registered letter shows Hamlin to be their choice.

Developments lead to the belief that Robert J. Crowley of Lowell and William P. Hayes of Springfield will continue to support Hamlin for the nomination for governor, no matter what may be the verdict of the special delivery letter canvass.

There was considerable talk about an independent Foss candidacy for governor in the event of Hamlin's nomination by the committee. Hamlin has declared flatly that he will support the nominee of the committee.

It was suggested to Messrs. Maynard and Macleod that they secure from Foss a statement similar to the one issued by Hamlin—that he will support the party nominee for governor. Such a statement, it was pointed out to Maynard and Macleod, would tend to remove the suspicion that Foss intends to run as an independent at the polls in the event of his defeat for the regular Democratic nomination.

James H. Vahey, one of the three candidates for the gubernatorial nomination at the state convention at Faneuil hall a week ago yesterday, declared in a statement issued yesterday afternoon that he favored the nomination of Charles S. Hamlin as the best move for the Democratic party of the state.

"I am not now a candidate and desire that my friends should not vote for me," he says. "It would be a gross breach of faith for me to be a candidate now after my statement in the convention. The contention is now between Mr. Foss and Mr. Hamlin. The committee has considered no other men."

"If Mr. Foss is nominated I will do as much for him as anyone else in the state. This statement is made without the slightest element of personal feeling, but solely because of solemn party duty and responsibility."

"I favor the nomination of Charles S. Hamlin because I regard him as the strongest candidate under present conditions and believe if he is nominated that he will sweep the state."

GREEK CABINET RESIGNS

Premier Believes That Country Is in Desperate Straits

Athens, Oct. 14.—The Greek cabinet of which M. Dragoumis is premier resigned yesterday. The ministry was formed Jan. 31. The resignation was due both to the complications with Turkey and to internal dissensions.

Premier Dragoumis has been attacked bitterly on the ground that he had failed to support the dignity of the country against Turkish aggression. In a recent speech the premier said that Greece had never before been in a position of such incredible danger from causes both external and internal since the accession of King George.

ONLY ONE OF ITS KIND

New Rockefeller Hospital is Ready to Begin Work

New York, Oct. 14.—All the forces of medical and surgical science will be centered on some one disease until it is vanquished in the new hospital annex to the Rockefeller Institute, which is open today to visitors, and which will throw its doors open to patients suffering from special ailments next Monday.

It is the only institution of its kind in the world. It differs from other hospitals in this, that its only patients will be those afflicted with some obscure disease or one for which no remedy is known at present.

Although the hospital is connected with one of the greatest institutions for research work in the world, its patients will not be made subjects of experiments.

The building is eight stories high and fitted with every modern surgical appliance. All who will be admitted will be fed, lodged, nursed and treated free.

NEW SHIP WINS TROPHY

Battleship South Carolina Has Good Lead Over Three "Stars"

Washington, Oct. 14.—The battleship South Carolina is the trophy winner, with a percentage of 54.466 in the elementary firing for qualification of pointers at the target practice, according to the figures compiled at the navy department. There were also three "star" ships with percentages of more than 45, these being the Mississippi, with 53.988 percent; the Michigan, with 47.733, and the Idaho, with 47.647.

Special attention is called at the department to the fact that the South Carolina and the Michigan were required to fire after being fewer than three months in commission, thereby being deprived of the experience and training which the other vessels in the competition had obtained.

The cruiser trophy was won by the Charleston, the Mayflower won the gunboat trophy, while the torpedo boat trophy was captured by the Reid.

MERELY STOOD BY BULK OF HIS PARTY

Beveridge's Vote Against Payne Bill Defended by Roosevelt

Richmond, Ind., Oct. 14.—When the Roosevelt special train rolled into Indiana from Illinois, Theodore Roosevelt plunged into the campaign to send Albert J. Beveridge back to the United States senate. He campaigned his way across the state and last night he said that there was "victory in the air."

Senator Beveridge voted against the Payne tariff bill. Roosevelt defended his action in regard to the tariff and his words were the nearest thing to an expression of an opinion in regard to the new tariff law which he has yet made.

"Senator Beveridge did not split from his party," the colonel said. "He merely stood by the bulk of it, because the real party consists of the mass of the people. The mass of the people wished to see done just what he did. And before the next presidential election comes around the platform will be fairly and squarely the platform for which Senator Beveridge stands."

TAFT TO VISIT PANAMA

Convinced That Problems Confronting Officials Require His Presence

Beverly, Mass., Oct. 14.—President Taft will sail for the isthmus of Panama on Nov. 10, from Charleston, on the armored cruiser North Carolina, and will be conveyed by a sister ship, the Montana. The president will be gone about twelve days.

The president had practically given up all idea of visiting the canal this year, until Colonel Goethals, chief engineer of the canal, spent two hours with him yesterday afternoon.

At the end of that time Mr. Taft had been convinced that the problems confronting the officials at Panama required his presence on the isthmus.

EXECUTION UNSATISFIED

Chanler's Tailor Bill of \$1062 Has Not Yet Been Paid

New York, Oct. 14.—The execution obtained by William Barnes, a Fifth avenue tailor, for \$1062 for clothes bought by Robert W. Chanler, husband of Mrs. Lina Cavallieri, was returned in the city court by the sheriff's office, marked unsatisfied.

The next legal step to be taken by the tailor in the effort to get his money will be an application for an order requiring Chanler to submit to an examination in supplementary proceedings.

MARINE CORPS WILL STAY

Washington, Oct. 14.—"Marines are highly desirable and valuable and will not be dispensed with under any circumstances that can now be foreseen," said Acting Secretary of the Navy Whitthrop.

YELLOW FEVER IN VENEZUELA

Washington, Oct. 14.—Yellow fever has appeared at Puerto Cabello, Venezuela, according to information received by the state department.

RESPECT FOR MAJORITIES

One thing for which the Democratic party leaders seem to have no respect is the rights of the majority.

In New Hampshire this year the political steam roller was brought into use to override any opposition to the man whom the Democratic machine wanted for governor, a man with the stigma of defeat upon him and with

a record of connection with the so-called "honest" trust.

In Massachusetts they got so afraid that a majority not to their taste would prevail in their state convention that they broke up the convention in a riot rather than permit such a thing to occur.

In New York the convention was about as boss ridden as it would be possible to make a convention, and there was no chance for expression of the popular will even if it were a majority.

The governing of southern states by a minority is one of the notorious evils of our American institutions.

When the Democrats were last in power in congress they passed a tariff bill in the interest of what their campaign arguments had called the privileged classes and utterly disregarded the wishes of the majority that had put them in power. They also refused to take any action on the trust question, President Cleveland's attorney general holding that the Sherman anti-trust law was unconstitutional and could not be enforced, and a congressional committee of which William J. Bryan was a member reporting that they didn't know what to do about it. The rights of the majority to be protected against extortion were completely disregarded, despite the party's campaign pledges.

Do you want to trust those party leaders with the care of the business of our state and nation? Won't it be better to vote the Republican ticket—the ticket of the party that does things?

BIRDSEYE VIEWS

Watch Portugal for the important world events of the next few weeks. Whether that country succeeds in adopting an apparently stable Republican form of government is doubtful in view of the illiteracy. With a population equal to that of New England the art of reading and writing is so little known there that the newspapers in number and circulation are only about equal to what we have in Rockingham and Strafford counties. It is in England's sphere of influence, but whatever England does about it, we may be sure that England will not make the mistake of alienating the people of Portugal in the way that English rule has alienated those of Ireland.

Advice to the southern farmers to advertise their farm products in newspapers was given at Hot Springs, Ark., at the state fair in an address by John M. Parker, of New Orleans, president of the Southern Commercial congress. "The northern and western farmer is up to date," said Mr. Parker. "He advertises what he has to sell, and pays the expense of that advertisement and derives the highest price for his product." Newspapers, Mr. Parker said, have led in the diversified farming movement; have helped bring soldiers into the south, and have been of great practical benefit to southern agriculture, but nevertheless their "advertisements are totally disproportionate to those of northern papers." The loss to the farmer in failing to advertise, Mr. Parker thought, was even more serious than the loss to the papers. It may well be remarked that the same advice holds good for New England.

AMONG OUR EXCHANGES

The Cruiser at Lisbon
Sound common sense and a keen insight into foreign affairs appears to have actuated President Taft in passing over the views of both the state department and the navy department and ordering the cruiser Des Moines to proceed to Lisbon. He will thus be able to give an object lesson of the peaceful uses to which the navy can be put. It is not an unfriendly visit; quite the contrary. The Des Moines will be at Lisbon ready to protect American citizens.

MOTHERS NEED Scott's Emulsion

Many mothers have learned how much they needed

Scott's Emulsion by taking it to show their children that it was a sweet medicine.
For thirty-five years it has been the best known specific against fatigue and enfeeblement, as well as the standard remedy for warding off and relieving colds and affections of the throat and lungs.

A TIMELY TOPIC

—BY—
REV. J. M. ENGLISH,
Of Boston

Indifference one of the great problems

THE average man is in love with material things and without any practical knowledge of God. Indifference is one of the great problems, one of the outstanding marks of today, and it is the mission of the church to overcome this indifference toward God by enriching the public service.

Public worship appeals more to the tender qualities of our emotions than preaching alone can do. It appeals to our esthetic sense and love of beauty. This problem of having more liturgical expression in our service is a vital one in our denomination.

Many ministers should learn how to pray instead of how to preach. What we need in our ministry is that the pastor should have a vivid vision of God when he ministers to his people. We should have better liturgical learning and more liturgical expression.

We must have a more liturgical worship or else we shall lose some of our best Baptists because of our barren devotion.

When I go into an Episcopal church I feel an atmosphere of devotion which I do not feel in the Baptist church.

Should any of them require protection and in many ways can be useful during the stirring events connected with the overthrow of the dynasty and the establishment of order. Indeed, she may never be called upon, but her presence is an assurance to Americans that help is at hand if needed. But more important than anything else is the fact that the American flag will be seen in the waters of the Portuguese capital at the time that the new republic that has been established is undergoing the first test of all republics, moderation in the treatment of those who disagree with the victors in the revolution.—New York Herald.

Will It Affect Cost of Living?

There can no longer be any question that this year the United States has raised the greatest corn crop in its history. The economic significance of this was pointed out in our news columns of yesterday, and it is only necessary to remember that the indicated corn yield of today is 100 million bushels in excess of the estimate of a month ago to appreciate the part which this crop plays in making up the sum total of national wealth. The comforting reflections which the yield of the corn crop of 1910 suggests are, however, not altogether without alloy. While we are making substantial advances in the total, the average yield per acre improves but slowly. It is true that for the ten year period, 1878 to 1887, it was but 24.40 bushels, while from 1888 to 1897 it remained substantially at the same figure. The ten years succeeding showed an average yield of 25.62 which would have been at least 26.5 but for the unfavorable conditions surrounding the crop of 1901. For the present year, as for 1908, the average of 26 bushels per acre has been but slightly exceeded, and in 1909 the yield did not approach that figure. There is, manifestly, a very large potentiality of increase to be looked for in the application of scientific methods to the culture of the cereal crops. Making all allowance for weather conditions there is not much to boast of in the fact that from an acreage of 96,737,681 acres in 1906 we took within 119 million bushels of the crop which will be harvested from 114,083,000 acres in 1910.—New York Journal of Commerce.

NAVY ORDERS

FEW DOSES END KIDNEY MISERY

Most Severe Backache or Urinary Trouble Simply Vanishes

In all the world there is no man or woman who can afford to neglect the slightest kidney disorder for one single day.

Kidney diseases are the most dangerous, because the first signs are seen in other parts of the body before anything wrong is noticed with the kidneys themselves.

Some of the symptoms, though, cannot be mistaken; for instance, a constant aching or misery in the back, sides or loins, or headaches and dizzy spells, nervous twitches, disturbed sleep, inflamed or puffy eyelids, heart palpitations, rheumatic pains, weakness, bilious stomach or a feeling of languor and fatigue. Sick, unhealthy kidneys also cause thick, cloudy, offensive urine or it is full of sediment, irregular of passage and often uncontrollable or attended by a sensation of stinging.

The time to cure kidney trouble is before it settles into Diabetes, Dropsy, Gravel, or Bright's Disease. The moment you suspect the slightest kidney, bladder or urinary disorder, begin taking Pape's Diuretic as directed, with the knowledge that there is no other medicine, at any price, made anywhere in the world, which will effect so prompt a cure. In just a few days you feel and know that the kidneys, bladder and urinary organs are all healthy, clean and normal and all danger passed.

Your physician, pharmacist, banker or any mercantile agency, will vouch for the responsibility of Pape, Thompson & Pape of Cincinnati, Ohio, who prepare Pape's Diuretic—50 cent treatment—sold by every druggist in the world.

BASEBALL YESTERDAY

The New York Giants defeated the New York Yankees in the opening game of a series, 5 to 1.

The All-Star team defeated the Philadelphia Athletics, 0 to 2.

STATE SHOOT

Scores Made By Soldiers from Here and Elsewhere

Manchester, Oct. 14.—When the individual contest closed on Thursday in the state shoot at Massabesic, it was found that the first prize in the match was won by Sergt. T. C. Fletcher of Company H, Keene, with a score of 92. Lieut. F. J. Thomas of Company H and Corp. Charles F. Moody of the First Company, C. A. C. of Portsmouth, were tied for second place with a score of 91, but under the rules of the National Rifle association Lieut. Thomas had the ranking score and was the winner. Private Ernest C. Barker of Company H won the individual National Rifle association with the magnificent score of 98.

The rules of the National Rifle association for deciding a tie are that the ranking score, that is, the one having the highest total at the longest range, shall be declared the winner. In the case of Lieut. Thomas and Corporal Moody each had 31 points at 500 yards, which would bring it back to the 300 yard mark at this range. Lieut. Thomas had 29 and Corporal Moody 28, and under the rules the 29 would be ranking score and win.

Each man had 7 counting shots at 200, 300 and 500 yards and the scores of the three leaders were:
Sergt. Fletcher 80 30 32—92
Lieut. Thomas 31 29 31—91
Corp. Moody 32 28 31—91
The National Rifle association match was won by Private Ernest C. Barker, Co. H, Keene, with a score of 98. Lieut. C. P. Bodwell, 1st Co., C. A. C., Portsmouth, scored 92.

The Company Match

When the bugles sounded the signal to cease firing the marksmen from Company H of Keene had scored 600 and won the company team match trophy. The men representing Troop A of the cavalry had also shot well and were second, only 30 points in the rear, with a score of 570. The scores by companies were:

Co. A, Manchester 410
1st Co., C. A. C., Exeter 405
Co. H, Keene 600
Co. E, Concord 540
1st Co. L, Berlin 471
Co. K, Manchester 553
Co. F, Manchester 567
Co. I, Nashua 422
Co. G, Keene 538
2d Co. B, Manchester 520
Co. C, Concord 346
1st Co., C. A. C., Dover 270
1st Co., C. A. C., Portsmouth 471
1st Co., C. A. C., Concord 546
Troop A, Cavalry, Peterborough 570
Co. M, Newport 373
Co. D, Nashua 514

Today's Work

The shooting today is by the battalion team.
The skirmish run over the 600 yard range will also be shot, and the revolver match between Troop A and Dittery A.

WHERE TO GET THE NEWS

Your Not Behind When You Are a Reader of the Herald

Naturally every resident of Portsmouth is more or less interested in the affairs of the city and especially in the local news of the day.

The Evening Herald is just what you should read for our after supper paper. Every item of local interest can be found on its pages. Every day its readers will find news that is printed while it is news.
You cannot keep posted unless you are a constant reader of the Herald.

WHERE YOU CAN PURCHASE HARMON'S FAMOUS SAUSAGE IN PORTSMOUTH

TEACHING THE TEXANS

O. L. Frisbee today sent a paper to be read at the convention of the

Interstate Inland Waterway League of Louisiana and Texas at Beaumont, Texas, Oct. 20 and 21, on the subject of "The other end of the canal," e. i., the extension to Maine.

He has informed that convention that New Hampshire has the corner on navy yards, commodious harbor and abundant water power which gives her a distinction among her sister states and when she develops her tidal power she will have a distinction among foreign states.

MISSION SERVICE

The mission services at Christ church on Sunday evenings are meeting with much success. The hearty singing led by the large church choir is truly inspiring and the direct and powerful preaching of the rector is creating deep interest.

ADVICE TO MOTHERS—Mrs. Winsor's Soothing Syrup should always be used for children teething. It soothes the child, cures the gums, allays all pain, cures wind colic and is the best remedy for Diarrhoea. Twenty-five cents a bottle.

Our Customers Are Fashion's Friends

Parents, we have given your wants for the children for fall and winter, our careful consideration.

Our Boys' Department, the largest and best lighted in this vicinity, is full to overflowing with new and stylish apparel for the husky youngsters.

Here are suits that look well, fit well and will "stand him through thick and thin." Suits with extra trousers, all wool, strongly made, at \$4.00 and \$5.00 a suit.

The Winter Overcoats for boys are here.

KITTERY LETTER

Won't Rebuild After the Fire

Sending Cheer to One in a Hospital

Kittery, Me., Oct. 14.
Kittery correspondent's telephone 295-5.

Mrs. Calvin Hayes is confined to her home on the Rogers Road by illness.

Mr. Martin H. Armon of the yard is on the sick list.

Mr. Francis L. Hatch of Dover was a recent guest in town.

Mrs. Alberta Cobb of the Point is passing a few days at her parents' home, during the illness of her mother, Mrs. Calvin Hayes.

Mrs. Frank Locke and sons Ralph of the Point were recent guests in town.

Frank C. Green of the U. S. S. Georgia is passing a few days in town as the guest of his parents, Mr. and Mrs. John Green of Love lane.

Mr. Charles Trafton pleasantly entertained the Young Woman's Branch of the W. C. T. U., at her home at the Intervene Thursday evening.

Mrs. James R. Philbrick entertained the Ladies' Social circle of the Christian church yesterday afternoon.

The York Rebekah lodge held a regular meeting in Odd Fellows' hall Thursday evening.

Mr. George Barrett has resigned his position on the yard as a ship fitter, and has accepted a better position in New Jersey.

Mrs. Judson Irish of the Point was a recent guest in town.

Miss Goldie Woodward was the guest of Mr. and Mrs. Samuel Hodgdon at the Point yesterday.

A number of people from town enjoyed the holiday festivities at Boston on Wednesday.

Mr. and Mrs. Charles Prince were recent visitors in Newburyport.

The five master Fannie Palmer is on the way from Baltimore with coal for this port.

Following the meeting of Naval lodge, A. F. and A. M., on Wednesday evening, at which time work was exemplified before district deputy grand master, a banquet was given to which over one hundred and fifty sat down. Visitors were present from Portsmouth and York.

A shower of postal cards was sent

on Thursday by the members of York Rebekah lodge to Mrs. Sumner Paul, who is at a Portland hospital for treatment.

Mrs. S. E. Boulter was a visitor at the Point on Wednesday.

Mrs. George Fernald of Portsmouth passed Thursday in town, the guest of friends.

The next meeting of the Pine Hill Whist club will be held at the home of Mrs. J. E. Paul.

Kittery Point

Kittery Point correspondent's telephone 295-5.

The Christian Endeavor Society of the First Christian church held a box party at the home of Miss Margaret Fletcher on Thursday evening, which proved not only a social but a financial success.

A second serious fire occurring Thursday forenoon which resulted in practically ruining the house of Mrs. Jane Patch. A great deal of credit should be given to the local fire department who by its immediate response and valuable aid, saved the town from a second disastrous fire.

Rev. and Mrs. Edwin P. Moulton passed Wednesday in South Berwick.

Mrs. Annie Manson was a recent visitor in York.

Mrs. Ellen Godfrey is the guest of her brother, Mrs. Herbert Tobey of Saugus, Me.

Mr. J. Fred Dorr is wiring his house for electric lights.

Mrs. Noah Emery and Miss Fannie, who are enjoying a month's vacation in Boston and vicinity, are passing a few days in Malden.

Mr. Jesse Frisbee of Dover was a visitor in town yesterday.

Mrs. Charles Phillips, who has been ill for a few days is able to be out of doors again.

Mr. Elmer Burnham of Kittery was a guest in town yesterday.

Mrs. Frank Blake will entertain the S. V. Fancywork Club tomorrow evening.

A goodly sum was made at the harvest supper Wednesday evening for the benefit of the Free Baptist church.

Mrs. Harry Handoff who has been ill, is much improved.

Frank A. Mace on Thursday concluded his duties as baggage master at the local depot.

The torpedo destroyer Drayton passed the harbor Wednesday on her endurance trial from Rockland to Thatcher's Island and return.

Jesse E. Frisbee, owner of two of the buildings burned in Sunday's fire, states that he will not rebuild. A gang of men began this morning to tear down the standing remains of the house occupied by Charles E. Phillips and family.

Latest arrivals to the harbor are schooners George H. Ames, Gray, Philadelphia for Portsmouth, 700 tons of coal; Mabel, Gray, Harpswell for Gloucester, fish.

Tug M. Mitchell Davis underwent her annual government inspection

Thursday, and is in commission today.

Sympathy for Mrs. Jane Patch, who was burned out Thursday morning, is widespread. The house will have to be very extensively repaired and replastered, before it is again habitable.

EVENTS OF ELIOT

The Wedding of Mr. Smith and Miss Staples

Eliot, Me., Oct. 14.

Richard Dixon, who was reported as ill, has developed a second attack of hemorrhage. He had a serious attack last spring, lasting more than a week.

Mrs. E. H. Sturtevant goes to Boston today. She has been at her summer home a few days after spending a month in Europe.

William O. Kennard had returned to him Wednesday a valuable Knights Templar charm which has an interesting story connected with it.

He lost it on his recent trip to the Chicago convention and it was found on the Maid of the Mist, the small steamer that runs at the foot of Niagara Falls.

It was found by Edward Voster of Piqua, Ohio, who turned it over to James H. Miles, the secretary of the local Masonic lodge, and through his able efforts, directed by the inscription on the charm he traced it back to its owner after corresponding with five different commanderies in the United States, of the same name.

Benjamin F. Smith of Hudsonville, Ill., and Ella May Staples of Eliot, were married at Dover on Monday by Rev. B. F. Eaton. After the ceremony the happy couple left with their attendants for a brief trip. On returning they will make their home in Portsmouth.

Sugar cured shoulders, ham and bacon at White & Hodgdon's.

BOSTON & MAINE

NEW OFFICIAL

T. E. Brown, assistant passenger agent, Boston and Maine railroad, with offices at Concord, has been appointed first assistant to Mr. C. M. Burt, General Passenger Agent, Boston and Maine Railroad, with headquarters at Boston.

Buy your goods at Benfield's and guess on the squash.

EXTRA GOOD DOUBLE TEAM

Also a Couple of Interesting Single Acts at Music Hall

Each of the three vaudeville acts won much favor with the audience at Music Hall last evening.

Palmer and Dockman furnished a splendid entertainment, their singing and talking act was especially good, both in music and in the dialogue portion of their act.

Mr. Palmer possesses a rich, baritone voice; which he used very effectively in rehearsing the solo "Garden of My Heart," and which brought forth great and well merited applause. He also gave some pleasing xylophone selections. A novel and very interesting feature, connected with this act was by Miss Dockman, who did some decidedly skillful work in balancing a chair with her teeth and the contortion feats were indeed wonderful. The arrangement of the scenery and decorations of large, Japanese lanterns suspended overhead, made a very pretty setting. Both these artists are well known to the public, as Mr. Palmer was formerly a member of the James A. Herne company, and Miss Dockman was very popular in musical comedy and gained great success when playing in "The Sunny Side of Broadway."

Mr. Mark Cobden, a native of Scotland, made a great hit as a character comedian. Clad in a genuine, highland costume, he gave an imitation of Harry Lander.

Another pleasing feature was the singing and dancing by Mr. Harry Frisley, the juvenile comedian, who has been quite a favorite in burlesque. He kept the audience greatly amused by his funny stories and his songs were catchy and his dancing was good.

The Christian Endeavor Society of the Second Christian church, Kittery, is preparing for a series of literary entertainments and has sent out notices to the members of the parts they are expected to prepare.

Taft's Last Days AT BEVERLY

TALKS OVER PANAMA CANAL
PROBLEMS AND ALSO RAISING
OF THE MAINE.

Beverly, Oct. 13.—A comparatively long list of callers at the Taft cottage today practically marked the end of the season in Beverly, so far as business engagements are concerned. Friday and Saturday have been left for engagements for the President and he will devote those two days to golf and motoring.

See Norton left tonight for his home in Chicago, to register. It also is announced that the President will go to Cincinnati to vote on Nov. 8.

Col. George W. Goethals, engineer in chief of the Panama canal, came to Beverly today to talk over Panama problems with the President. Most of these problems are constructive at the present time. The other tangled problems about the storage of coal at either terminals, the rates of toll to be charged or the allowance of free passage, etc., will be met when they actually present themselves. The thing that concerns the President and Col. Goethals just now is to get the canal built and opened on schedule time.

President Taft has not yet definitely made up his mind about going to Panama in November. As time goes by, however, without a decision being announced, it is regarded here as more than probable that the President may postpone his visit to the isthmus until next March, following the adjournment of congress.

Gen. W. H. Bixby, chief of engineers of the U. S. army, who is in charge of the proposed work of raising the bulk of the old battleship Maine in Havana harbor, also saw the President and discussed various features of the work as disclosed by the preliminary examinations.

James E. Watson, formerly representative in congress from Indiana, talked politics with the President. Other callers at the Woodbury point cottage were Samuel J. Elder of Boston and Ernest Thompson Bacon.

ACCERTS POSITION

Professor Dixon of Dartmouth to
Study Railway Economics

Hanover, N. H., Oct. 14.—Professor Frank H. Dixon head of the department of economics at Dartmouth college, has accepted the position of chief statistician of railway economics and will be absent from Dartmouth the first semester, making headquarters at Washington, but will return to Hanover next semester for his regular college duties.

Last year Professor Dixon prepared a monogram on the history of transportation on the Mississippi river and two years ago worked out railroad transportation figures for the ways and means committee of the senate.

Local gunners report birds very scarce this fall.

THE NAVY'S NEW OPTIC NERVE

HOW THE MAN IN THE FIGHTING TOP
FLASHES PRINTED OBSERVATIONS
TO THE MAN BEHIND THE GUN

THE Naval battle of the future between the giant dreadnaughts of the deep will be decided by the deadly work of the big guns long before the fighting monsters steam within range of the smaller batteries. In such a fight information relative to the distance and speed of the foe's ships will be of vital importance to the grim fighters upon whose manipulation of the great steel cannon in the turrets depends the outcome of the conflict. The fighting top of the new battleship, high above the deck, becomes the eye of the fighting monster, and upon the preservation of communication between this precarious perch upon the great skeleton mast and the "brains" of the ship below the coming tower depends the efficiency of the giant fighting machine. Today the loud-speaking telephone is largely depended upon for the transmission of intelligence from lookout to the fighting arms of the ship. In the din of battle it is quite evident that such method of communication would be at least decidedly unreliable, if not inoperative. A system which would cause printed observations to appear beside each great gun would prove of inestimable value for the dreadnaught type.

It is just such a system that Uncle Sam has ordered installed in his up-to-date navy and work upon the monster Nebraska's new optic nerve will commence at once. The new wonder is a typewriting tele-

graph device. The outlook in the fighting top takes his observations and then writes out his message upon the keyboard of what looks like an everyday typewriter. Instantly the clicking keys cause varying electrical impulses to operate the proper mechanism in the hold of the ship and the chief officer's typewriter and those in the turrets automatically writes the message upon a sheet of white paper.

A Ghost Machine.

It looks like a ghost machine as the keys move up and down and the letters appear upon the paper with no one at work upon the machine. But, say, an invisible magician greater than any conjurer of the fairy tales of yore is pressing each key in its proper turn and causing the message to appear. Electricity is the producer of greater marvels than ever the Genii of Aladdin's Lamp.

The magic carpet that transfers the being upon it to any place upon the mere expression of a wish is no more wonderful than the telephone which enables you to be in two places at once or this strange typewriter whose keyboard is a thousand miles from the paper upon which it is writing its message. Think of it! Your friend may even now be reading the letter you are writing him over there on that somber machine with the gleaming steel keys!

This magic telegraph system is the invention of an engineer who stands preeminent today as an expert in telegraphy and electrical science. Dr. Cardwell was the engineering advisor of the late Jay Gould. His many successful inventions are said to have netted him not far from three-quarters of a million dollars. One alone, the automatic telephone switch, was said to bring \$300,000.

Dots and Dashes Doomed.

What the invention means to the field of telegraphy can be readily imagined. It is even predicted that the business man will soon be able to send instantly his own telegrams without leaving his office and do it in a fraction of the time now taken by the most expert professional telegrapher, and for over seventy years has been the only method practicable for commercial telegraphy will be a forgotten relic of the past, keeping company with the smoke and blunderbuss of the North American Indian and the gigantic slow working semaphore of the French revolution.

Telegraphy of one sort or another has been practiced since the most remote annals of history were engraved in the archives of time. The ancient Egyptians, the Chinese, the Persians, the Greeks, the Romans, all had a certain skill in sending messages by the signals. Old Roman signal towers are found today in Spain and Italy from which at one time flashed the word that Caesar was victorious in Spain or that the Gauls had crossed the Alps on their way into the sunny valleys of old Italy. The news of a great victory of the Greeks at Marathon was flashed by flame from Marathon to Leaden. The news of their telegraphed the coming of the conquering sword of cruel Spain along the great roads of the Golden

Empire. Montezuma knew of the landing of Cortez in old Mexico days before the brazen helmets of the "soldados" gleamed before the towers of the Aztec metropolis.

Like a Romance of Old.

And so on down through the pages of history we can trace the evolution of the telegraph from the breaking of Gideon's pitched to the electric marvel conceived and produced by Morse in 1837. The whole story is one of romance, but no greater magic was ever wrought than the accomplishment of the latest marvel the telegraph typewriter of Dr. Cardwell. The romance lies not in the pictorial levers and wheels of shining steel but in the hopes and disappointments the toil and perseverance that brought about at last so great a result.

During the past half century the very ablest electrical experimenters have been at work in every corner of the world upon the great problem of how to make telegraphy quicker, surer, and cheaper, and yet since Professor Morse's first successful demonstration of his electrical telegraph no radical improvements have been made generally useful and the original scheme of communication by dot and dash signals conceived by our pioneer inventor is still used by the telegraph companies, for want of a better way, although slow, cumbersome, expensive and requiring the attention of skilled operators who cannot prevent the occurrence of frequent mistakes, often very costly, in transmitting the unrecorded sense of the code system into written messages.

Early Attempt Failed

As early as 1847 the House printing telegraph was tried out by its inventor, but it was so slow, uncertain and complicated that it could not demonstrate any practical utility. Another device of the same sort, the Hughes register, also registered a dismal failure. Just imagine a telegraph with a regular piano keyboard over two feet long! Such was one of the devices with which some engineers experimented. A score of famous names have been connected with the apparently hopeless quest for the ideal telegraph, among them those of Wheatstone and Edison.

Millions of dollars had been spent in experimental research, all to no apparent purpose when Dr. Cardwell and the eminent engineers who were collaborating with him finally demonstrated the success of the first practical printing telegraph. The highest authorities consider Dr. Cardwell our ablest telegraph and telephone expert and this reputation has been won by close application and hard work and the perfection of many inventions of vital importance to the science of communication.

Used by Long Island Railroad.

During the year in which the new invention has been in daily use by the Long Island Railroad it has demonstrated its usefulness and the possibilities of its use for rapid and accurate recording of messages. It is in successful communication between the offices of the Interurban Telegraph News company in Philadelphia and the American Telegraph

Typewriter company in New York, and instruments have been ordered by several railroads, most notably the New York Central, Lackawanna, Pennsylvania, and Hudson Tubes. Orders have also been received from New York City News association.

The machines should prove useful to fire and police departments, business houses, banks, and strange to say telegraph companies. The invention is in no way a competitor for the business of the latter, but on the contrary, a valuable adjunct. The investment required for equipment, maintenance and salaries is staggering. One of the effects of a large telegraph company is quoted as saying that Dr. Cardwell's telegraph invention will enable the companies to give better service and at the same time reduce expenses by millions of dollars annually.

How it Works.

The machine uses very little electric current, working perfectly on a telephone wire at the same time as the telephone without interfering with conversation. The principle of operation of any particular key sends a combination of electrical impulses differing from those of any other key, while the receiving device is so adjusted that only a certain part of the

THEATRICAL TOPICS

TWENTY-FIVE FREE TICKETS

For Portsmouth School Children to
See "The Shepherd King"

The whole city is thoroughly inter-
ested in the Herald's plan to issue
25 free tickets, the best in the house,
for the performance of Wright Lor-
imer in "The Shepherd King" at Mu-
sic Hall next Thursday evening, to
the public and parochial school chil-
dren, making the best essays on the
play.

Many people, prominent in church
and educational circles, have ex-
pressed the opinion that the idea is
a most excellent one. It affords the
children a rare opportunity of see-
ing a series of great tableaux depict-
ing episodes in Biblical history.
These tableaux have been arranged
from models afforded by pictures
painted by the old masters and will
impress strongly on the minds of the
children vivid pictures of scenes, of
which they have read in stories from
the Bible. For the young student of
ancient history they have an import-
ant educational value also. The
great production furnished by Wm.
A. Brady, is as historically correct
as it is possible to make it. The
services of celebrated Biblical schol-
ars, some of them very learned Jew-
ish rabbis, were requisitioned in the
organizing of the production. The
costumes, accessories of the sol-
diers, the customs, the palaces of
Saul, the homes of the humble and
the great encampment of the Israel-
ites in the Vale of Elah, all are re-
produced with extreme fidelity to the
best accounts of writers of that and
succeeding periods.

Such an opportunity is an exceed-
ingly rare one and the enterprise of

DAVID SINGING BEFORE SAUL IN ACT 2 OF "THE SHEPHERD KING"

the Herald in taking advantage of it
has been commended by hundreds of
Portsmouth's best citizens. The ex-
pressions to this effect have been
very gratifying, indeed, to the man-
agers of the contest.

Detailed conditions of the contest
have been announced in previous is-
sues of the Herald, but already quite
a few essays have been received, al-
though the contestants have until
next Tuesday noon in which to get
their compositions to this office. Those
who get their papers in today evident-
ly had their interest aroused to such
a pitch that they simply could not
delay, and so immediately got busy
with their pens after reading the
conditions of the contest.

Conditions of the Contest

The conditions of the contest are
here given as there are still many in-
quiries about the matter. Each con-
testant must be a regularly enrolled
student of the Portsmouth public or
parochial schools, or of some similar
school in the vicinity, and must write
his or her name, grade, teacher's
name, the name of the school and the
class to which he or she belongs, and
his or her address upon the upper
left hand corner of the paper. Only
one side of the paper should be
written upon. The writing should be
as neat and legible as the writer can
make it, as neatness and legibility
will count in judging the papers. The
essays, when complete, should be
mailed or brought to the Herald of-
fice and addressed to "The Shepherd
King" Editor. All essays must be
in the hands of this editor not later
than Tuesday noon.

Each essay should be about 150
words in length, although a few more
or less will not be necessarily dis-
qualify the writer. The shorter the
better. The writers of the best pa-
pers will receive tickets. There are
no coupon conditions attached to the
contest and no requirements that the
writers shall be subscribers to the
Herald. All compositions will be
judged according to the school grade
of the writers. Thus the pupil in
the fourth grade will have as good a
chance of winning as the high school
student. Anyone giving false infor-
mation as to his grade at school will
be disqualified and barred from fur-
ther participation in the contest.

The synopsis of the story is as fol-
lows:

Story of "The Shepherd King"

"The Shepherd King" deals with a
period 2000 years distant. The cen-
tral figure is David, and the story be-
gins at the home of his father, near
Bethlehem, where the simple life of
the shepherd lad, who afterwards be-
comes king, is shown in its primitive
surroundings. Here comes Prince
Jonathan and the Princess Michal,
bearing a command from their father,
Saul, the mad king, commanding
David to play and sing before him at
his encampment. The second act
shows the Israelish camp at Elah,
which has been harassed by the Philis-
tines for 40 days and nights. Goliath,
the mighty giant of Gath, has
repeatedly challenged any of Saul's
army to meet him in combat, but no
one has been found who is brave
enough to go against him. The cap-
ture of a notorious Edomite while en-
gaged in an act of treachery, brings
on Saul one of his mad spells, and he
raises his javelin to strike the traitor
to the earth, when David, by his sing-
ing and playing, charms away the
king's anger and restores his reason.
Again comes the fierce challenge of
Goliath. David offers to meet him
with his sling and the death of the

boasting monster at the hands of the
shepherd forms the climax of the
act.

Act three is the throne room of the
palace of Gibeon, two years later.
Saul has begun to fear and hate Da-
vid and a great jealousy takes pos-
session of his heart. His eldest
daughter, Merab, having learned from
the prophet, Samuel, that David is to
become king at the death of Saul,
now seeks his love, but David is con-
stant to Michal, whose life he has
saved and whom the king has prom-
ised for his wife. He is also comfort-
ed by the strong friendship of Jon-
athan, who has learned that of which
David has not yet dreamed, that at his
father's death, it is David and not he
who is to become king. In an out-
burst of anger, Saul attempts to slay
David but his life is saved by little
bond maiden Andora who rushes be-
tween them and receives the javelin's
thrust. David turns upon the king and
denounces him for his wicked-
ness and amid the flashing of the
lightning and the rolling of thunder of
the gathering storm, that proclaims
Jehovah's wrath, he renounces his
command and rushes out into the
night.

The first scene in the fourth act
takes place in the cave of the Witch
of Endor, six months later, where
Saul has come to learn something of
the future. The spirit of Samuel ap-
pears to him and foretells his death
and that of his son. The last scene
is in the courtyard of the palace the
next day. Saul and his army have
been routed, his son slain, and him-
self mortally wounded. The arrival
of David turns defeat into victory. He
is reunited to Michal and upon Saul's
death, ascends the throne.

Phil Ott Next Week

Phil Ott Next Week

When looking for clean whole-
some amusement don't forget Phil
Ott's comedians are coming to Music
Hall next Tuesday and Wednesday.
Musical comedy, clean, crisp, bub-
bling, scintillating, and expressly
written for a real star, than whom
there is none better is on its way,
and will open a two days engage-
ment at Music Hall at popular prices.

That it is Phil Ott's comedians
goes without the saying, since this
is the only organization on the road
today making any such claim. But
the beauty of it all is they make
good every representation.

To be sure Phil Ott himself has
been one of the foremost entertainers
on the stage for many years, and al-
ways commanded high figures in the
way of salary. But his comedians
were never heard of until the open-
ing of last season. They have liter-
ally sprung into first place at a sin-
gle leap, and are now in demand
from ocean to ocean, scarcely a mail
reaching the office that does not bring
its load of requests for the "first avail-
able time. Those who enjoy the lat-
est novelties in musical comedy, re-
plete with dances, marches, pretty
costumes, scenic settings, tuneful
music, latest songs, charming show
girls and really funny comedians,
headed by the funniest fun-maker
on any stage, must see Phil Ott's
Comedians.

They will play two evenings and
Wednesday matinee.

WANTS MORE COAST ARTILLERY

BIG APPROPRIATIONS RECOM-
MENDED FOR THE PORTS
MOUTH DISTRICT.

Washington, Oct. 14.—Brig. Gen.
Murray, chief of coast artillery, dis-
cusses various matters of interest to
New England in his annual report.
He says that the New England states
have not sufficient coast artillery
militia properly to assist the regular
coast artillery in manning the coast
defences within their borders.

The number required in Massachu-
setts is 73 officers and 1780 men, while
the state artillery corps consists of
50 officers and 737 men. In Maine
55 officers and 1300 men are required
but the strength of the militia coast
artillery is 13 officers and 609 men.
In New Hampshire the requirements
call for 18 officers and 394 men, com-
pared to the present strength of 14
officers and 222 men. Rhode Island
has a coast artillery organization con-
sisting of 63 officers and 769 men,
but 60 officers and 1379 men are re-
quired. In Connecticut 62 officers and
1441 men are required, but there are
available only 50 officers and 644
men.

The report states that approxima-
tions are required for completing cen-
tral power plants and supplying addi-
tional power called for by the Taft
board, at New England forts, as fol-
lows:

Massachusetts—Fort Heath, \$16,
115; Fort Banks \$3590, fort Standish
\$58,872, fort Andrews \$31,801, fort
Revere \$27,355, fort Rodman \$43,129.
Maine—Fort Poppleman, \$3,790; Lyon,
\$3,120; McKinley, \$7,313; Leavitt, \$9,
601; Preble, \$36,391; Foster, \$47,414.
New Hampshire—Fort Stark, \$4,
909; Constitution, \$34,618.
Rhode Island—Fort Adams, \$49,500;
Waterhill, \$104,978; Getty, \$60,258;
Kearney, \$3,074; Mansfield, \$60,795.

With appropriations heretofore
made, Gen. Murray says the standard
fire control system has been install-
ed in the defences of Boston, Port-
land and the other larger ports, but
other ports have only the provisional
system, pending further appropria-
tions by congress. There is still re-
quired for fire control installation,
under the plans of the Taft board,
\$3200 for the defences at the mouth
of the Kennebec river, Maine, \$140,
475 for the Portsmouth artillery dis-
trict, \$181,050 at the New Bedford
and \$752,500 in Narragansett bay.

An estimate of \$1,465,000 is sub-
mitted for searchlights. This includes
an item of \$186,309 for searchlights
to be used in connection with the
great guns surrounding Boston har-
bor.

To carry out the scheme to con-
centrate the coast artillery, additional
barracks and quarters must be
constructed included the following:

At Boston—The company barracks,
one band barracks, two field officers'
quarters, four captains' and lieuten-
ants' quarters, total estimated costs
\$174,000.

At Portland—One field officers'
quarters, two captains' and lieuten-
ants' quarters, one non-commission-

ed officers' quarters, total costs \$43,
000.

At Portsmouth—Three company
barracks, two field officers' quarters,
10 captains' and lieutenants' quar-
ters, total cost \$279,000.

At New Bedford—One company bar-
racks and five captains' and lieuten-
ants' quarters, total costs \$92,000.

In the Narragansett bay district—
One company barracks, one field of-
ficers' quarters, six captains' and lieuten-
ants' quarters, four bachelor quar-
ters, eight noncommissioned officers'
quarters, total costs \$165,000.

New London district—One company
barracks, one field officers' quarters,
two captains' and lieutenants' quar-
ters, total cost \$77,000.

Little of this work can be carried
out for some time, as the estimates
have been cut to \$38,000, which will
enable only the most necessary work
to be done in the next fiscal year.

Under the approved plan of dis-
tribution, Boston will have 12 compan-
ies of coast artillery, Portland 12,
Portsmouth 3, New Bedford 2, Narra-
gansett 9 and New London 13.

The city of Newburyport on Thurs-
day night for the first time had all
night electric light service. It has
been a hard fight to get them, but
they came at last.

Feet So Sore Couldn't Walk Down Stairs

TIZ Cured Her Quick

If you have sore feet, tired feet,
sweaty feet, lame feet, tender feet,
smelly feet, corns, callouses or bun-
ions, read what happened to Mrs.
Crockett, of Jeffersonville. TIZ DID
IT. Mr. Crockett says: "After the
second treatment she walked down-
stairs one foot at a time. She has
not been able to walk downstairs be-
fore in past five years, except by
stepping down on each step with one
foot at a time. This is remarkable.
Send five more boxes."

No matter what ails your feet or
what under heaven you have used
without getting relief, just use TIZ.
It's different. It acts right off. It
cures sore feet to stay cured. It's
the only foot remedy ever made which
acts on the principle of drawing out
all the poisonous exudations which
cause sore feet. Powders and other
remedies merely clog up the pores.
TIZ cleans them out and keeps them
clean. You will feel better the first
time it's used. Use it a week and
you can forget you ever had sore
feet. There is nothing on earth that
can compare with it. TIZ is for sale
at all druggists, 25c per box, or direct,
if you wish, from Walter Luther
Dodge & Co., Chicago, Ill.

MODERN MAGIC

Sleeping in earth's dark recesses,
Leaping upward to the day,
Tempted by the sun's carousals
Forth in silent gloom to stray,
Like a mighty melted jewel
Swift and silent it flows;
Next, a fiery monster cruel,
It augments a nation's woes.
Deeply bubbling!
Light as air,
Cheering, troubling
Everywhere!

Rushing o'er the world below us,
Hurling madly through the sky
At the call of men who show us
That they do not fear to die.
Lovers leap and wheels are grinding
In the great, mysterious change,
Now a force beyond all binding;
Now an odor faint and strange—
Necromancer
Werd, I ween!
What's the answer?
Gasoline.
—Washington Star.

There were but three drunks at
the police station last night.

The Rye Grange were the guests on Thursday evening of the local grange, and they were given a jolly time. A supper followed the lodge work and a social.

Hand's Creamery, 26 Congress St., formerly Jackson Ex. office. Butter, Cream and Eggs.

The football teams from the Tennessee and Montana are to play at the Kittery grounds on Saturday afternoon. This is the third game, in both previous games neither side were able to score.

There are several small wood fires burning about this section, unless there is a heavy fall of rain there will be a great loss.

NAVY YARD

The Eagle Sailed for Hayti

Twenty Six Patients in the Hospital

Modification of Physical Test after January 1

Eagle Sails on Thursday
The gunboat Eagle, Lieut. U. S. Macy commanding, sailed for southern waters on Thursday afternoon. The vessel and crew will be engaged in survey duty of the coast of Hayti during the winter.

Another Ship Sends a Patrol
The commander of the gunboat Dubuque has followed the idea of the other ships at the navy yard in sending a patrol ashore each night.

Ready for Work Again
Otis F. Healey, laborer, and C. J. Drew, wireman, who have been furloughed owing to sickness, have reported for duty again.

Said to Need Repairs
The collier Leonidas, now at Hampton Roads, is said to be badly in need of repairs. This vessel is assigned to this yard as home port and an effort should be made to see that this station gets the work.

A Full House
The naval hospital is at present crowded to its capacity. Thirty-six patients are there for treatment.

Docks Tomorrow
The cruiser Montana will go in the dry dock at 6:45 on Saturday morning for painting and repair of sea valves.

Called Today by Labor Board
Three unners and two plumbers' helpers were called for duty today.

Thirteen From the South
One prisoner from the U. S. S. Atlanta at Charleston and twelve from the Norfolk yard arrived today for the Southern.

Who Will It Be
There is much speculation as to who will receive the appointment of master shipfitter as a result of the recent examination. The papers and recommendation of the examining board have been forwarded to the department.

New Messenger for Supplies and Accounts
George B. Williams of Kittery Point has been appointed messenger in the department of supplies and accounts.

Officers' Physical Test
Reports have it in navy circles that the modification of the physical test which the officers are required to take yearly will not be effective before January 1, 1911. This is owing to the fact that a large number of the officers have already done the required hike.

P. A. C. POOL TOURNAMENT

Up to date twenty-four games have been pulled off and much interest is displayed each night when the members appear at the tables.

Twenty-one more games are to be played. Thirty-nine points at present divide the teams. The score of Thursday night matches are as follows:

NOTED AUTHOR HERE

William J. Locke, the English novelist, and a party of American friends he is entertaining during his vacation, registered at the Hotel Rockingham Wednesday night on their return from a trip into Maine.

With Mr. Locke were Rev. Mr. Boyden, Albert A. Boyden and Al-

bert Boyden of Beverly, Mass., R. S. Stearns of Boston and Prescott Keyes of Concord, Mass.

PERSONALS.

Miss Anna McCarthy has resigned her position as clerk at the Woolworth store.

Mrs. Edith Gentner has returned to Kittery, after a few days' visit to her home in Cambridge.

Albert P. Haskell of Beverly, Mass., formerly of this city, is seriously ill with typhoid fever.

Rev. L. H. Thayer, D. D., is in Boston to attend the centennial anniversary meeting of the American board of Congregational missions.

Mrs. Sarah Hart and Mrs. E. T. Rand of this city have been the guests this week of Mr. and Mrs. Edgar Leighton at Somersworth.

R. P. Boyer, vice president of the Lincoln Mortgage and Loan Company of San Francisco, is the guest of the local representative, M. H. Bell.

Mrs. Arlene Lessor, Miss Marjorie Mowe of this city and Mrs. E. H. Holly of Skowhegan, Me., left this week on a trip to Atlantic City and Philadelphia.

Messrs. T. F. Flanagan, W. J. Kershaw, Dr. S. T. Ladd, E. C. Turbell and C. W. Bass of this city were at the Brookline Country club open meet on Thursday.

Frank Lynch, Dr. M. A. Higgins, Joseph M. Hassett, Edward J. Rutledge, William Dow and Shirley B. Woods are among the Portsmouth people who saw the Columbus day parade in Boston.

Master Stanhope Ring celebrated his eighth birthday Thursday entertaining at his wigwam, No. 5 Middle street, the following friendly braves: Masters Charles Sise, Calvin Bartlett and Robert Mavin.

MOVING PICTURES ALL NEW

Splendid Group of Films Shown Today at Music Hall.

All brand new are the reels of moving pictures shown today at Music Hall, every one of them released for exhibition on Oct. 13. They are

"A Lucky Toothache," Biograph—How a toothache was cured by kissing a girl and getting her so angry that she forgot the ache. The kisser narrowly escapes a lynching.

"The Masher," Biograph—How poor Hiram got the blame for the sins of another man in the park. Hiram didn't mean any harm, but he incurred the vengeance of two women, including his wife, and also got arrested.

"Out for Mischief," Melies—The comical mischief of two children with some paint and a brush. They succeed in getting themselves into trouble.

"In the Golden Harvest Time," Selig—A beautiful film, the subject of which is indicated by the title. It is one of those worth everyone's time to see.

WORKING OVERTIME

Quoit Men Tossing the Rings By Lantern Light

Quoit pitching by the light of lanterns is the latest in sporting circles. By this overtime work on the part of the men who toss the rings at the Jones bottling department it looks as if they intend to be prepared to give the navy men from the Tennessee a hard job to win out when that long talked of match comes off.

POLICE COURT

John Tracy, John O'Brien, Alfred Field and Robert Jackson were before the court today on a charge of drunkenness. O'Brien got a sentence of six months at the county farm and the others were released.

Towle's Fancy Grocery Store, 72 Congress St.

ELECTRICITY CHEAPER THAN CANDLES

The cells at the state prison in Concord are lighted with electricity. They were formerly lighted by candles and the change was made because electricity was found to be cheaper. It also gives the prison officials easier control of the lights. Private parties might well take a hint from this.

All steaks lower at Benfield's. Takay, Salem and Concord grapes at Benfield's.

STRUCK BY BALLOON

Woman Gets \$3000 For Injuries

The jury in the case of Mrs. Caroline Canney of Farmington vs. the Rochester fair association, which opened in the superior court on Wednesday morning at Dover, reported yesterday afternoon, after being out three hours, a verdict for the plaintiff with damages assessed at \$3000.

Mrs. Canney sued for \$10,000 for injuries received by being struck by a falling balloon Sept. 22, 1909, while driving to Rochester with her sister. She had watched the balloon rise from the fair ground until it disappeared in the clouds. The empty envelope shot down with great force, it was claimed, covering the rig she and her sister were in and injuring her spine.
